Experience

Senior Product Manager, CHECK24 Profis

January 2022 - Present

Implemented a future-proof IT-infrastructure, which enabled us to give the users more customized user flows by planning and adding new shared backbone services and rebuilding 1st-level features, that will be used by every fork, by defining shared APIs.

Improved the usability of iOS & Android application by replacing an integrated WebView- with a native chat messenger including new features (e.g. add appointment, swipe to see message details).

Product Manager, CHECK24 Profis

April 2019 - December 2021

Improved the speed of software release cycles by a factor of 3 by writing scripts that test all critical feature flows inside a web browser.

Reduced business spent per year by 25k EUR by replacing our Salesforce integration with custom build back office features (e.g. call logs, e-mail inbox, ticketing system).

Founder, Print Mania UG

March 2019 - Present

Build a print-on-demand business from scratch, which generated a revenue of 70k in 2021 by creating sneaker designs and using Node.js frameworks like Puppeteer.js or Playwright.js to automated repetitive operational processes.

Junior Product Manager, CHECK24 Profis

April 2018 - March 2019

Grew users-signup number from 30 per day by 30% MoM by implementing an automated e-mail sending-process which informed cold leads about real customer inquiries on our platform and their business growth potential.

Reduced number of errors and user complaints by 5% WoW by replacing an outdated Ruby on Rails application with a GraphQL APIs and a ReactJS front-end web application using Material UI as a design system and implementing new features based on direct user feedback.

Project Manager (working student), IBM iX

April 2018 - March 2019

Supported the IBM iX project-management team to deliver IT-projects for its client Volkswagen, by doing data analyses, HTML coding and testing new web features.
